

FWD-75Z8H/T

75" BRAVIA 8K HDR Full Array
LED Professional Display

Overview

Step into the breathtaking world of big-screen 8K detail with this BRAVIA FWD-75Z8H/T, with Full Array LED 8K HDR and Sony's powerful X1 Ultimate processor, it reproduces more intense depth and detail, so whatever you're viewing, you will also enjoy an exquisite image with deeper blacks and brighter highlights.

The BRAVIA FWD-75Z8H/T is ideally suited to professional use, with Pro mode allowing quick and easy customisation to suit different environments. Android TV lets you do more, with the display's intuitive built-in software platform broadening control and customisation options even further.

With its minimalist one slate design and thin bezel, the BRAVIA FWD-75Z8H/T delivers a truly compelling big-screen 8K experience, drawing your audience deeper into the screen without distractions. Pictures and sound are blended in beautiful harmony: tweeters are integrated into the TV frame, letting your audience hear sound that's in the right place, while advanced control and Pro Mode teamed with optional interactive compatibility and embedded HTML5 platform makes it easy to create

attractive digital signage so you always present a clear image.

Enrich your audience's display experience with seamless TEOS integration and a choice of built-in solutions to add extra functionality, from meeting room support to automation, with no need for any external devices or players.

For even greater peace of mind, there's the added reassurance of our 3 Year Advanced Exchange service that's included as standard. If there's a problem with your display, we'll offer a free, brand new replacement product rather than a repair. You can also choose to extend your support for an additional 2 years.

Features

8K offers 16 times the detail of Full HD, with a resolution of over 33 million pixels bringing unprecedented clarity to corporate display, education and signage applications.

Full Array LED precisely balances light output across the screen, illuminating separate LED zones for more realistic contrast by making light areas lighter and dark areas darker. Contrast is enhanced further by 8K X-tended Dynamic Range™ PRO that ensures brighter peak highlights and deeper shadows.

Twice as fast as our X1™ Extreme processor, the X1™ Ultimate processor ensures 8K resolution pictures with four times the resolution of 4K for scenes rich in depth, texture and detail. 4K and 2K are upscaled close to 8K by Sony's 8K X-Reality™ PRO engine using a unique 8K

database, while Object-based Super Resolution reproduces lifelike textures.

Object-based HDR Remaster analyses and adjusts colour of individual on-screen objects, reproducing greater depth and textures for more realistic pictures.

Powered by our X1 Ultimate processor, TRILUMINOS Display maps colours from a wider palette, faithfully reproducing a world of more vivid, lifelike hues and tones. The X-Wide Angle panel ensures colours always stay true from wherever you're watching in the room.

Latest X-Motion Clarity™ technology keeps on-screen movement smooth and clear, boosting brightness when needed so you don't miss a thing.

Acoustic Multi-Audio technology incorporates tweeters into the TV frame, with independently controlled amplifiers that let sound follow the action for a truly immersive experience.

BRAVIA features a minimalist 'one slate' design with a thin bezel, ensuring a more immersive big-screen viewing experience with fewer distractions.

Discover a world of apps and online content powered by Android TV. Use Voice Search to find content easily without typing. Easily share content with Google Cast.

Customise and store display settings and features, then copy easily to multiple displays via USB flash memory.

Integrated support for HTML5 makes it easy to produce compelling digital signage. Combine graphics, text, video and live web content to create attractive signage in minutes with no extra hardware or special training.

Control BRAVIA remotely – including on/off, input signal select and adjust volume – over IP via RJ45 by web API.

BRAVIA integrates seamlessly with TEOS, Sony's suite of workspace management applications that orchestrate control of devices and content in boardrooms, meeting areas and public spaces.

There's extra reassurance with our 3 Year Advanced Exchange PrimeSupport service that's included as standard. If there's a fault with your BRAVIA Professional Display, we'll provide a replacement unit at no extra charge to keep you up and running.
